Annex P
(normative)

Data type definitions

P.1 General information

This annex covers all *data type definitions* in the ATS independent on the SUT type.

P.2 Data types for PICS

```
module DataStructure_PICS_15118_2 {

    type enumerated PkiType {
        PKI_1,
        PKI_2,
        PKI_3,
        PKI_4,
        PKI_5,
        PKI_6,
        PKI_7
    }

    type integer LoopCounter (30..infinity);

}

module DataStructure_PICS_15118 {

    type enumerated ChargingMode {
        aC,
        dC
    }

    type enumerated IdentificationMode {
        pnC,
        eIM
    }

    type enumerated PlugType {
        type1,
        type2
    }

    type enumerated CableCapabilityACType {
        capability13A,
        capability20A,
        capability32A,
        capability63A,
        capability70A
    }

    type enumerated EIMDone {
        beforePlugin,
        afterPlugin,
        duringSlac,
        v2gAuthorization
    }

    type enumerated ZeroPow {
        sleepWithoutCharge,
        sleepAfterCharge,
```
